

The contact page contains relevant metadata for language, description, name, author, and keywords to meet SEO and accessibility standards. The page setup is basic, consisting of a “Contact Us” h1 section followed by the same nav section that all three pages share. The next section contains a quick paragraph explaining the form it contains, as well as the form itself. Each input text box in the contact form is labeled and id’d appropriately. Following the main content of the page is a footer section with a mailto link containing the service’s email address.
